Introduction

MEDITRACK®, established since 1999, is renowned for its indigenous design to ensure smooth operation and installation flexibility. It comes in prefabricated track components allowing for any last minute changes in site dimension. The track joints are bridged with a continuous PVC liner to ensure no notching to glider crossing the track joints. PVC sliding gliders are used instead of roller wheels for strength and to eliminate any need for maintenance. It ensures a snag free operation for a very long time.

All MEDITRACK® products comes with a 10 years manufacturer warranty.

SUGGESTED SPECIFICATION

1 MEDITRACK | Cubicle Curtain Track

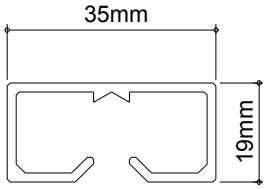

MEDITRACK® type MC 800 cubicle track size 20mm(W) x 30mm(H) made of aluminium, natural anodized to 15 microns c/w continuous PVC liner, nylon gliders and hooks, plastic and cap, connecting bridge, overlapping joint connector, wall brackets with matching screws, cut to various length and shape including necessary bend to required curved fixed with sufficient hanger rods extended to the soffit of concrete slab with brackets holders and screws all strictly in accordance with manufacturer's instructions.

2 MEDITRACK | Intravenous Track

- IV Track Section at 35mm(W) x 19.2mm(H).
- IV Track finish shall be 15 micron natural anodized finish.
- IV Track complete with end cap, connectors and miscellaneous fittings as required.
- MEDITRACK® IV Carrier trolley comes with brake system is set when load is applied. One carrier to a set of IV Support Track.
- MEDITRACK® bottle holder with 16" telescoping vertical adjustability and four collapside IV Station located at telescoping shaft and one rotatable IV Station located at bottom of shaft.
- One Bottle Holder to a set of IV Support Track.
- Track system to be installed at flush ceiling level.

I.V. Tree & I.V. Carrier Specification

Image of Product	Descriptions
	**I.V. TRACK** • Pre-bended to 'U' Shape • Heavy duty Aluminium Track in Natural Anodized
 Premium  Standard	**I.V. TREE** • 5 Point Telescopic • Adjustable pole height (Min 600mm to Max 900mm) • Convenience of compact storage available by folding 4 legs when not using • Heavy duty Aluminium Tube and Stainless Steel Hooks
	**I.V. CARRIER** • High density Zinc Anodized • Comes with locking system • Stainless Steel Hook

INTRAVENOUS (I.V.) FEEDING SYSTEM

MEDITRACK®
A Unique Design in Hospital Cubicle Curtain Track

Cubicle Curtain Track Model MC 800

Designed for versatile and flexible fitting on site, it accommodates last minute changes of site dimensions by the way of its indigenous ‘Track Joint System’ that enables Sliders to run freely across the Joints without any snag.

The Hanger Rod is robust and always mounted to the concrete slab above the ceiling to ensure it withstands human load, in incidences whereby a falling patient may hang on to the cubicle curtain.

About TSI Engineering

Trusted to Build What Matters

Since 1993, TSI Engineering has been building and shaping spaces that people rely on every day, from corporate offices to the hospitals that safeguard our nation's health.

Over the decades, we have earned the trust of over 70% of Malaysia's hospitals, delivering specialised building products that stand for uncompromising quality, proven reliability, and innovation that endures.

We design, source, and manufacture solutions that are built to last, meticulously tested to meet the highest national and international standards, and tailored to meet the unique needs of each environment we serve.

TSI Engineering is proud to be a trusted partner in building better spaces for today and for generations to come.
